

# Cleaning the TLT Tilly Head Make-up Masks PTU 4, 5 & 6

Jennifer Lenard

Internationally acclaimed professional Make-up Artiste and Tutor Jennifer Lenard is a great advocate of the TLT Tilly Head, PTU make-up masks and the full PTU range.

Jennifer is continuously exploring new designs, trialling new products on the PTU make-up masks, and has shared some of her effective cleaning tips.

Cleaning the TLT Tilly Head make-up masks when using them for:

### General Makeup

- 👤 Warm water with washing up liquid
- 👤 Wet wipes
- 👤 Surgical Spirit
- 👤 Avoid using products with high pigment as these will stain

### Prosthetics

- 👤 IPA
- 👤 Hand sanitizer
- 👤 PRO cleaner, which is an oil-based product make-up artist use to remove glue
- 👤 Baby oil

### Working with strong colours

- 👤 When working with strong colours such as red, apply
- 👤 Derma Shield to the mask first to prevent staining the mask.
- 👤 Derma Shield will protect the silicone from absorbing these strong colours.
- 👤 If the mask has discolouration from a strong colour such as Red use shaving foam, which will remove the discolouration.

### Adding Hair to the Tilly Make-up mask

- 👤 Apply Prozade prosthetic glue to the make-up mask and then add hair such as beards.
- 👤 To cleanse and remove the hair after use simply use prosthetic remover with a warm flannel.
